(54) **EDIBLE FILM EASILY DISPERSIBLE IN WATER**

(57)Abstract:

PURPOSE: To obtain an edible film which can be easily disintegrated by immersing in water to release a food, by mixing a micro-fibrillated water-insoluble natural fiber with a polyhydroxy compound and using the mixture as a binder.

CONSTITUTION: Microfibrillated water-insoluble natural fiber such as cellulose, chitin, chitosan, etc., and a polyhydroxy compound such as monosaccharide, oligosaccharide, polysaccharide, polyhydric alcohol, pullulan, gelatin, pectin, etc., are suspended in water. A food having the form of powder, granule, flake, etc., is mixed to the obtained suspension and the mixture is cast and dried in the mixed state.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
